Professional Summary

Data Analyst and Power BI Developer with 5+ years across operations, manufacturing reporting, and process improvement in system integration, process automation, and digital transformation. Expert at leveraging AI-assisted workflows and data analytics to drive operational excellence and organizational capability. Proven track record of bridging the gap between technical infrastructure and end-user adoption, delivering scalable digital learning pathways, and implementing robust data governance frameworks to enhance talent development and compliance reporting.

Work Experience

Data & Operations Analyst | DEFOR SA

May 2025 – Present

- Built the company's first centralized Power BI reporting capability as the sole analyst, supporting up to **15 stakeholders** across **3-5 concurrent projects** and **10 production stages**.
- Unified **four sources** - REST API, Autodesk Construction Cloud, Speckle failover, and CSV - into a **star-schema** semantic model, **replacing manual reconciliation** with one trusted operational view.
- Reduced refresh time from **5-15 minutes to 1-2 minutes** by implementing incremental refresh, enabling near-live, self-service status reporting.
- Designed a paginated REST-to-Fabric ingestion pipeline using **OneLake, PySpark, and Delta tables**, with **incremental watermarks** and Bronze-to-Silver processing.
- Co-built a web-based building information application using **React, Vite, Xano, and Python**, enabling synchronized 2D/3D inspection of IFC, FRAG, and GLB models.

Operations Data & Reporting Analyst | All For Expo

Feb 2023 – Apr 2025

- **Centralized operational tracking** via an enterprise portal, replacing manual workflows (WhatsApp/Email) to provide a single source of truth for **4 divisions**.
- Improved data integrity by consolidating disparate datasets, enabling reliable inventory control and financial monitoring for project lifecycles.
- Acted as the **operational bridge** between business requirements and technical solution delivery, including managing user-onboarding documentation and digital learning resources to ensure successful adoption and compliance.

Process Control & Reporting Engineer | UFLEX Group

Oct 2019 – Sept 2022

- Reconciled **Oracle ERP entries against live production output**, catching discrepancies before they reached reporting and driving engineering-led corrective actions for quality and downtime.
- Enhanced operational transparency by generating high-frequency production summaries, providing **actionable insights for engineering-led corrective actions**.
- Designed automated process controls and accompanying training documentation, establishing a verification-first mindset for **data-modeling, process compliance**, and ongoing talent development.

Skills

- **L&D Operations & Analytics:** Manufacturing KPIs | Production Reporting | Root Cause Analysis | Workflow Mapping | Requirements Gathering | Data Validation | SOP Development | KPI Monitoring
- **Learning Technology & Automation:** Microsoft Fabric | SQL | Power BI (DAX/M) | ETL Pipelines | AI-Assisted Workflow Automation | Low-Code/No-Code (Rapid App Development) | Scripting (Python)
- **Business Applications & Integration:** Oracle ERP | Autodesk Construction Cloud | React | TypeScript | 3D Data Visualization (IFC/GLB) | BPMN/UML
- **Digital Learning Platforms:** LMS Administration, Content Strategy, Instructional Design, Talent Process Governance

Selected Projects

- **Warehouse Management System:** Designed and built a business-focused inventory tracking application (React/TypeScript) to eliminate reliance on manual communication and create a centralized source of truth for stock levels.
- **3D Building Information Application:** Developed a web-based 3D visualization tool (React/Vite) that overlays construction status onto IFC/GLB models, improving on-site inspection efficiency for engineering teams.

Education

- B.Eng. in Engineering & Industrial Management | Poznań University of Technology (2022–2026)
- Erasmus BIP | Babeş-Bolyai University, Romania (2024)

Certifications

Completed Certifications

- Microsoft ETL Specialization, IBM Python for Data Science, UC Davis SQL for Data Science

Certifications in Progress

- Microsoft Fabric Analytics Engineer Associate (DP-600), Microsoft Power BI Data Analyst (PL-300)

Languages

- English: Fluent (C1) | Polish: Beginner (A1)
