

Om Bhartiya

Data Analyst | Power BI Developer | Reporting & Analytics

Poznan, Poland | ombhartiya16@gmail.com | +48 516 901 712 | linkedin.com/in/om-bhartiya-b22279185

Authorized to work in Poland (residence permit with right to work)

PROFESSIONAL SUMMARY

Data Analyst with 5+ years of experience in operational and KPI reporting across manufacturing, construction/facade, warehouse, inventory and project operations — including the past 1+ year specializing as a dedicated Power BI Developer. Build dashboards, automated reporting workflows and validated, decision-ready insights using Power BI, SQL, Power Query, DAX, REST APIs, Excel and Power Automate, turning fragmented operational data into near-live, stakeholder-ready reporting. Manufacturing KPI and Oracle ERP reporting background grounds a validation-first approach to BI delivery.

PROFESSIONAL EXPERIENCE

Data Analyst / Power BI Developer | *DEFOR SA Srem, Poland*

05/2025 - Present

- Delivered 3+ Power BI dashboards for construction, production, management and client-facing teams, giving 20+ stakeholders near-live visibility into progress, KPIs and project status.
- Built reporting solutions for construction/facade progress using Power BI, DAX, Power Query, REST APIs, Excel data and semantic models.
- Improved reporting freshness by redesigning data mapping and refresh workflows, supporting hourly pipelines and 10-minute dashboard update logic for construction/facade tracking.
- Reduced manual status reporting by 5-10 hours/week by automating Power BI Service refreshes with Power Automate, scheduled refresh and refresh monitoring.
- Converted REST API and BIM/Revit-linked data into structured reporting layers using Power Query ETL, semantic models and Fabric/OneLake/Lakehouse concepts.
- Defined KPI logic with stakeholders, validated report outputs, tested dashboards and supported UAT before release.
- Supported dashboard publishing, workspace management, documentation and stakeholder handover for controlled report delivery.

Digital Operations & Reporting Automation Specialist | *All For Expo Nowe Miasto, Poland*

02/2023 - 04/2025

- Replaced fragmented warehouse, inventory, project, order, invoice and payment spreadsheets with centralized reporting tools for operational visibility.
- Designed SQL/Excel-supported reporting views to monitor stock movement, project progress, order status, invoice/payment status and workflow performance.
- Built a Warehouse OS internal tool for warehouses, products, stock, movements, users and inventory visibility using React/TypeScript and dashboard-style UI patterns.
- Cleaned and consolidated operational datasets from spreadsheets, cloud collaboration tools and manual trackers into structured reporting layers used by operations, accounting, warehouse and project teams.
- Gathered KPI/reporting requirements from business users and translated them into internal tools, process dashboards and reporting workflows.

Process Control & Operational Reporting | *UFLEX Group Wrzesnia, Poland*

10/2019 - 09/2022

- Monitored production KPIs across 2 active production lines per 8-hour shift using Oracle ERP data, daily reports and structured process checklists.
- Prepared daily operational reports and recurring SOP/process documentation to support engineering visibility, corrective actions and production performance review.
- Reviewed production and process data from ERP records, shop-floor reports and checklists to identify downtime patterns, quality issues and follow-up actions.
- Supported root-cause analysis by collecting, validating and reporting operational inputs for engineering and production teams.
- Maintained SOP/process change documentation and collaborated with engineering, quality and production teams to improve process consistency and reporting reliability.
- Built a foundation in manufacturing KPI reporting and Oracle ERP operational data, later applied directly to BI/dashboard delivery.

Intern Trainee - Assembly Frame Department & HR Operations | Honda Cars India

08/2018 - 04/2019

- Completed structured internship across automotive assembly, HR operations, shop-floor coordination, documentation, safety workflow records and quality checks.
- Gained early exposure to structured operations, process documentation, safety workflows and manufacturing coordination.

SELECTED ANALYTICS WORK

- **Construction / Facade Progress Reporting:** Reusable Power BI dashboard logic for construction progress, production status and stakeholder visibility using REST API data, Power Query transformations, semantic models and scheduled refresh.
- **API-Based Reporting Workflow:** Microsoft Fabric / OneLake / Lakehouse concepts for API-based reporting workflows, including structured data layers for project reporting and dashboard consumption.
- **Operational Reporting Tools:** Warehouse, inventory, order, invoice, payment and project-tracking reporting views replacing fragmented spreadsheets with centralized operational visibility.

Live case studies, dashboard walkthroughs and code: [ombhartiya.github.io/om-bhartiya-portfolio](https://github.com/ombhartiya/om-bhartiya-portfolio)

SKILLS

Analytics & Reporting: Power BI Desktop & Service, DAX, Power Query, SQL, Excel reporting, KPI dashboards, drillthrough, data visualization

Automation & Integration: REST APIs, JSON, Power Automate, scheduled refresh, dataflows, data gateway, Microsoft Fabric / OneLake / Lakehouse exposure

BI Delivery: Semantic models, dashboard publishing, refresh monitoring, UAT handover, workspace management, data validation, stakeholder documentation

Business Domains: Construction/facade data, BIM/Revit-linked data, manufacturing KPIs, warehouse/inventory, Oracle ERP

EDUCATION

Bachelor's Degree, Engineering / Industrial Management (Graduated) |

Poznan University of Technology Poznan, Poland

10/2022 - 03/2026

Erasmus Blended Intensive Programme,

Digital Product Development & Reverse Engineering-2 | Babes-Bolyai University 3 ECTS

04/2024 - 06/2024

Mechanical Engineering Studies | Amity University Greater Noida, India

2016 - 2019

CORE COMPETENCIES

- Data Analysis: Operational data interpretation, KPI tracking and reporting logic
- Reporting Automation: Refresh workflows, scheduled reporting and manual reporting reduction
- Data Quality: Validation checks, UAT support, output testing and reporting reliability
- Stakeholder Delivery: Requirements gathering, handover, documentation and business communication
- Process Improvement: Root-cause inputs, workflow visibility and operational performance support
- Business Intelligence: Dashboard storytelling, semantic models and decision-support reporting

CERTIFICATIONS & LANGUAGES

Certifications: ETL Data in Power BI - Microsoft; Data Analyst with Excel - Microsoft; SQL for Data Science - UC Davis; Python for Data Science, AI & Development - IBM

Languages: English - Full Professional; Polish - Elementary; Hindi - Native
