Professional Summary

Operations-focused Data & Business Analyst with 5+ years of experience in manufacturing and industrial environments. Expert at leveraging data analytics, automation, and AI-assisted workflows to optimize supply chain visibility, inventory accuracy, and production reporting. Proven track record of bridging shop-floor operations with management-level insights, delivering standardized data governance, and driving process improvements that eliminate manual overhead and operational bottlenecks.

Work Experience

Data & Operations Analyst | DEFOR SA

May 2025 – Present

- Orchestrated a **90%** reduction in report refresh times (from 15 minutes to under 2) by re-architecting data pipelines with incremental loading for real-time decision support.
- Standardized data governance by establishing the company's first Power BI Center of Excellence, delivering end-to-end analytics to **15+** stakeholders across 10 production stages.
- Unified 4+ fragmented data sources into a centralized semantic model, improving unit tracking accuracy and site visibility through 3D-linked BIM data integration.
- Engineered scalable ETL workflows in Microsoft Fabric using PySpark and SQL, processing 5,000+ records per load to manage data ingestion for production units.
- Accelerated operational tool delivery by utilizing AI-assisted workflows to deploy a production 3D-BIM visualisation application, streamlining cross-functional site visibility.

Operations Data & Reporting Analyst | All For Expo

Feb 2023 – Apr 2025

- Centralized operational tracking via an enterprise portal, replacing manual workflows (WhatsApp/Email) to provide a single source of truth for 4 divisions.
- Improved data integrity by consolidating disparate datasets, enabling reliable inventory control and financial monitoring for project lifecycles.
- Acted as the operational bridge between business requirements and technical solution delivery, replacing manual workflows (WhatsApp/Email) with automated digital tracking.

Process Control & Reporting Engineer | UFLEX Group

Oct 2019 – Sept 2022

- Reconciled Oracle ERP entries against live production output, catching discrepancies before they reached reporting and driving engineering-led corrective actions for quality and downtime.
 - Enhanced operational transparency by generating high-frequency production summaries, providing actionable insights for engineering-led corrective actions.
 - Designed automated process controls that bridged engineering requirements with ERP data, establishing a "verification-first" mindset for data-modeling and process documentation.
-

Skills

- **Operations & Analytics:** Manufacturing KPIs | Production Reporting | Root Cause Analysis | Workflow Mapping | Requirements Gathering | Data Validation | SOP Development | KPI Monitoring
- **Data & Automation:** Microsoft Fabric | SQL | Power BI (DAX/M) | ETL Pipelines | AI-Assisted Workflow Automation | Low-Code/No-Code (Rapid App Development) | Scripting (Python)
- **Business Applications & Integration:** Oracle ERP | Autodesk Construction Cloud | React | TypeScript | 3D Data Visualization (IFC/GLB) | BPMN/UML

Selected Projects

- **Warehouse Management System:** Designed and built a business-focused inventory tracking application (React/TypeScript) to eliminate reliance on manual communication and create a centralized source of truth for stock levels.
- **3D Building Information Application:** Developed a web-based 3D visualization tool (React/Vite) that overlays construction status onto IFC/GLB models, improving on-site inspection efficiency for engineering teams.

Education

- B.Eng. in Engineering & Industrial Management | Poznań University of Technology (2022–2026)
- Erasmus BIP | Babeş-Bolyai University, Romania (2024)

Certifications

Completed Certifications

- Microsoft ETL Specialization, IBM Python for Data Science, UC Davis SQL for Data Science

Certifications in Progress

- Microsoft Fabric Analytics Engineer Associate (DP-600), Microsoft Power BI Data Analyst (PL-300)

Languages

- English: Fluent (C1) | Polish: Elementary (A2)
