

Om Bhartiya

Data Analyst / Power BI Developer

Poznan, Poland | +48 516 901 712 | ombhartiya16@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Data Analyst and Power BI Developer with 5+ years of experience connecting manufacturing and project operations with decision-ready data. Builds governed pipelines, semantic models and dashboards using SQL, Power BI, Power Query, DAX and Microsoft Fabric to improve visibility, data quality and operational decisions.

CORE CAPABILITIES

- Power BI & Analytics:** DAX and Power Query | KPI definition and dashboard UX | Refresh optimisation | Publishing and mobile layouts
- SQL & Data Modelling:** SQL querying and transformation | Star-schema design | Semantic models and relationships | Source reconciliation and validation
- Fabric & Data Pipelines:** OneLake and Lakehouse patterns | PySpark and SQL transformations | Incremental API ingestion | Orchestration, run control and recovery
- Operations & Automation:** Process and root-cause analysis | Low-code and AI-assisted workflows | REST APIs and workflow applications | Manufacturing and construction data

PROFESSIONAL EXPERIENCE

Data Analyst / Power BI Developer | DEFOR SA

May 2025 - Present

- Reduced report refresh time by approximately 90%-from 15 minutes to under 2-by re-architecting data pipelines with incremental loading.
- Established the company's first Power BI Center of Excellence and delivered end-to-end analytics to 15+ stakeholders across 10 production stages.
- Unified 4+ fragmented sources in a centralized semantic model, improving unit tracking and site visibility through 3D-linked BIM data.
- Built scalable Microsoft Fabric ETL workflows with PySpark and SQL, processing 5,000+ records per load for production-unit ingestion.

Operations Data & Reporting Analyst | All For Expo

Feb 2023 - Apr 2025

- Centralized operational tracking in an enterprise portal, replacing fragmented WhatsApp and email workflows with one source of truth across four divisions.
- Consolidated disparate datasets to support reliable inventory control and financial monitoring throughout project lifecycles.
- Translated operational requirements into automated digital workflows and practical technical solutions.

Process Control & Reporting Engineer | UFLEX Group

Oct 2019 - Sep 2022

- Reconciled Oracle ERP entries against live production output, identifying discrepancies before they reached management reporting.
- Produced high-frequency production summaries that supported engineering action on downtime and quality issues.
- Designed repeatable process controls linking engineering requirements, ERP data, validation and process documentation.

SELECTED PROJECTS

Construction Progress BI | [Power BI](#) | [Operational analytics](#)

- A production reporting system for construction and facade operations that brought fragmented progress, issue and delivery data into one decision-ready model.
- Reduced report refresh time by approximately 90%, from 15 minutes to under 2 minutes, while supporting 15+ stakeholders across 10 production stages.

[Evidence: public repository](#)

API Ingestion Pipeline | [Microsoft Fabric](#) | [Data engineering](#)

- A Microsoft Fabric workflow for turning paginated operational REST data into analytics-ready Delta tables.
- Produced repeatable operating guidance for incremental and full-refresh entities, including recovery, rerun and production-support procedures.

[Evidence: public repository](#)

Oracle ERP Reconciliation | [Manufacturing](#) | [Data quality](#)

- An operational reconciliation process for finding differences between ERP records, shift reporting and physical production activity.
- Improved the reliability of production reporting and gave engineering teams clearer evidence for downtime, quality and corrective-action discussions.

SUPPORTING APPLICATIONS

Warehouse Management Application - An independently built warehouse product with role-based workflows for warehouses, products, stock, movements and dashboard statistics.

BIM Model Workflow & Public IFC Viewer - Professional work included a Vite and Three.js BIM workflow using That Open, web-ifc and Python tooling for IFC, FRAG and GLB models, with property inspection, filtering, clipping and synchronized plan/3D views. The linked React/TypeScript repository is an independent public adaptation-not the employer implementation.

EDUCATION

B.Eng. in Engineering & Industrial Management | Poznan University of Technology Awarded March 2026
Erasmus Blended Intensive Programme, Romania | Babes-Bolyai University 2024

PROFESSIONAL LEARNING

- Completed - Microsoft ETL Specialization
- Completed - IBM Python for Data Science
- Completed - UC Davis SQL for Data Science
- Certification preparation - Microsoft Power BI Data Analyst (PL-300)
- Certification preparation - Microsoft Fabric Analytics Engineer (DP-600)
- Developing - Agentic AI workflows: tool use, RAG, guardrails and evaluation

LANGUAGES & AVAILABILITY

English - Fluent (C1) | Polish - Beginner (A1)

Poland-based | TRC holder | open to on-site, hybrid and remote employment
