Professional Summary

Data Analyst and Power BI Developer with 5+ years of experience transforming manufacturing, construction and project operations into decision-ready data. Experienced in building governed pipelines, semantic models and dashboards with SQL, Power BI, DAX, Power Query and Microsoft Fabric, combining process automation and user enablement to improve visibility, data quality and operational adoption.

Work Experience

Data Analyst / Power BI Developer | DEFOR SA

May 2025 - Present

- **Built DEFOR's first centralized Power BI reporting capability as the sole analyst**, supporting 15+ stakeholders across 3-5 concurrent projects and 10 production stages.
- **Unified four sources - REST API, Autodesk Construction Cloud, Speckle and CSV** - in a star-schema semantic model, replacing manual reconciliation with one trusted operational view.
- **Reduced Power BI refresh time from 5-15 minutes to 1-2 minutes with incremental loading**, enabling near-live self-service reporting.
- **Designed a paginated REST-to-Fabric pipeline processing 5,000+ records per load**, using OneLake, PySpark, Delta tables, incremental watermarks and Bronze-to-Silver transformations.

Operations Data & Reporting Analyst | All For Expo

Feb 2023 - Apr 2025

- **Centralized operational tracking across four divisions**, replacing fragmented WhatsApp, email and spreadsheet workflows with one enterprise portal.
- **Consolidated inventory**, project and financial datasets across four divisions, improving data consistency and lifecycle monitoring for active projects.
- **Bridged business requirements and technical delivery**, producing onboarding documentation and digital learning resources that supported user adoption and process compliance.

Process Control & Reporting Engineer | UFLEX Group

Oct 2019 - Sep 2022

- **Maintained 99% reporting accuracy through Oracle ERP reconciliation**, comparing entries with live production output and catching discrepancies before management reporting.
- **Delivered 2 production summaries per day**, enabling engineering teams to identify downtime and quality issues and prioritize corrective actions.
- **Designed repeatable process controls and training documentation**, linking engineering requirements with ERP validation and process compliance.

Skills

Data Analytics & BI

Power BI (DAX, Power Query), SQL, Microsoft Fabric, semantic modeling, Excel, KPI reporting

Data Engineering & Automation

ETL pipelines, OneLake, PySpark, Python, REST APIs, AI-assisted workflow automation, low-code/no-code

Operations & Process Improvement

Requirements gathering, root-cause analysis, workflow mapping, data validation, SOP and onboarding documentation

Business Applications & Integration

Oracle ERP, Autodesk Construction Cloud, React, TypeScript, BPMN/UML, IFC and GLB data

Selected Projects

- Warehouse Management System: Designed and built a business-focused inventory application for products, stock movements and dashboard statistics, replacing fragmented manual communication with one operational view.
- Building Information Application: Co-built a React and Vite application for IFC, FRAG and GLB models with status overlays, filtering and synchronized plan/3D views to improve engineering inspection and site visibility.

Education

- B.Eng. in Engineering & Industrial Management | Poznan University of Technology (Awarded March 2026)
- Erasmus Blended Intensive Program, Romania | Babes-Bolyai University (2024)

Certifications & Professional Learning

- Microsoft ETL Specialization
- IBM Python for Data Science
- UC Davis SQL for Data Science
- CSCMP Supply Chain Foundations: Demand Planning Professional Certificate
- Salesforce Sales/Operations Professional Certificate
- Microsoft Power BI Data Analyst (PL-300) - certification preparation
- Microsoft Fabric Analytics Engineer (DP-600) - certification preparation

Languages

- English - Fluent (C1) | Polish - Beginner (A1)
