Professional Summary

Data Analyst and Power BI Developer with 5+ years of experience transforming manufacturing and project operations into decision-ready data. Skilled in building governed pipelines, semantic models and dashboards with SQL, Power BI, Power Query, DAX and Microsoft Fabric to improve visibility, data quality and operational decisions.

Work Experience

Data Analyst / Power BI Developer | DEFOR SA

May 2025 - Present

- **Cut Power BI refresh time by approximately 90%**, from 15 minutes to under 2 minutes, by replacing full reloads with incremental data loading.
- **Established DEFOR's first Power BI Center of Excellence**, delivering standardized reporting to 15+ stakeholders across 10 production stages.
- **Unified 4+ fragmented data sources in a centralized star-schema semantic model**, improving production-unit tracking and 3D-linked site visibility.
- **Built Microsoft Fabric ETL workflows with PySpark and SQL**, processing 5,000+ records per load for production-unit ingestion.

Operations Data & Reporting Analyst | All For Expo

Feb 2023 - Apr 2025

- **Centralized operational tracking across four divisions**, replacing fragmented WhatsApp, email and spreadsheet workflows with one enterprise portal.
- **Consolidated inventory**, project and financial datasets across four divisions, improving data consistency and lifecycle monitoring for active projects.
- **Translated business requirements into automated digital workflows**, reducing reliance on manual operational handoffs.

Process Control & Reporting Engineer | UFLEX Group

Oct 2019 - Sep 2022

- **Maintained 99% reporting accuracy through Oracle ERP reconciliation**, comparing entries against live production output before management reporting.
- **Delivered 2 production summaries per day**, enabling engineering teams to identify downtime and quality issues and prioritize corrective actions.
- **Designed repeatable process controls**, linking engineering requirements with ERP data validation and process documentation.

Skills

Data Analytics & BI

Power BI (DAX, Power Query), SQL, Microsoft Fabric, semantic modeling, Excel, KPI reporting

Data Engineering & Automation

ETL pipelines, OneLake, PySpark, Python, REST APIs, data quality and reconciliation

Process & Operations

Oracle ERP, requirements gathering, root-cause analysis, process mapping, manufacturing and construction analytics

Selected Projects

- Warehouse Management System: Designed and built a role-based application for products, stock movements and dashboard statistics, replacing fragmented inventory workflows with one operational view.
- Building Information Application: Co-built a 3D web application for IFC and GLB models with value overlays, filtering and synchronized plan/3D views to improve cross-functional site visibility.

Education

- B.Eng. in Engineering & Industrial Management | Poznan University of Technology (Awarded March 2026)
- Erasmus Blended Intensive Program, Romania | Babes-Bolyai University (2024)

Certifications & Professional Learning

- Microsoft ETL Specialization
- IBM Python for Data Science
- UC Davis SQL for Data Science
- CSCMP Supply Chain Foundations: Demand Planning Professional Certificate
- Salesforce Sales/Operations Professional Certificate
- Microsoft Power BI Data Analyst (PL-300) - certification preparation
- Microsoft Fabric Analytics Engineer (DP-600) - certification preparation

Languages

- English - Fluent (C1) | Polish - Beginner (A1)
