Business Data Analyst | BI & Process Improvement

+48 516 901 712 | ombhartiya16@gmail.com | [in/om-bhartiya-b22279185](https://in.linkedin.com/in/om-bhartiya-b22279185) | github.com/OMBHARTIYA | [Portfolio](#)

Poland - open to relocation | Authorised to work in Poland

PROFILE

Business Data Analyst with 5+ years across manufacturing, construction and operations, combining **stakeholder requirements, process improvement, data validation and BI delivery**. Built DEFOR's first **Power BI capability**, turning fragmented operational data into **near-real-time reporting for up to 15 stakeholders**. Earlier centralised cross-functional workflows and reconciled **Oracle ERP** against actual output. Strong at translating business questions into **trusted KPIs, clear processes and practical reporting solutions**.

CORE SKILLS

Business Analysis & Delivery: Requirements Elicitation, Stakeholder Analysis & Management, Business Process Analysis, Process Mapping, KPI Definition, Requirements Documentation, **UAT Support**; BPMN, UML, User Stories & Acceptance Criteria (working knowledge)

Data & Business Intelligence: Power BI Desktop & Service, SQL, DAX, Power Query, Advanced Excel, Semantic Models, Star Schema Modelling, **Data Quality & Validation**, Data Visualisation, Incremental Refresh, RLS

Systems & Integration: Oracle ERP, Microsoft Fabric, OneLake, Lakehouse Notebooks, ETL Pipelines, **REST APIs**, JSON, Power Automate, Dataflows, On-Premises Data Gateway, Autodesk Construction Cloud, BIM / Revit / IFC, Git

EXPERIENCE

Data Analyst / Power BI Developer | DEFOR SA

05/2025 - Present

Srem, Poland | Facade design and manufacturing | Power BI, SQL, Fabric, REST APIs

- Partnered with management, production, warehouse, logistics, site teams and clients to **translate reporting needs** into DEFOR's first **Power BI capability**, supporting **up to 15 stakeholders** across 3-5 concurrent projects.
- Defined and validated KPIs and status logic** across **10 production stages**, giving stakeholders **one trusted view** of units produced, completed, installed, delayed and progressing through each stage.
- Unified **four fragmented sources** - REST API, Autodesk Construction Cloud, Speckle failover and CSV - into one **semantic model** linked to the **3D building model**, allowing users to locate each unit and its status in context.
- Replaced daily snapshot reporting with a **30-60 minute near-real-time cycle** and one-click refresh, enabling cross-functional teams to **self-serve current status** instead of waiting for daily update meetings.
- Improved refresh from **5-15 minutes to 1-2 minutes** by redesigning the data pipeline with **incremental refresh**, then extended the solution through **Microsoft Fabric** when requirements outgrew native Power BI.

Operations Data & Reporting Analyst | All For Expo

02/2023 - 04/2025

Nowe Miasto, Poland | Exhibition stand build and fit-out | Part-time alongside studies

- Gathered requirements directly** from project managers, warehouse, logistics, finance and production teams, then replaced a workflow spread across WhatsApp, phone calls and email with **one centralised tracking system** used daily.
- Consolidated Google Sheets, Drive, Gmail and loose PDFs into a **single source of truth** covering **project stages, materials, stock, invoices and payment status** for every active and completed project.

Process Control & Operational Reporting Engineer | UFLEX Group

10/2019 - 09/2022

Wrzesnia, Poland | Flexible packaging manufacturing | Oracle ERP, Advanced Excel

- Reconciled Oracle ERP** entries against shift checklists and physical output, investigated recurring discrepancies and worked with engineering to turn **downtime and quality patterns into corrective actions**.
- Produced **two operational reports every 24 hours** across two production lines, tracking output, inventory and material produced versus consumed to support **production control and data accuracy**.

CERTIFICATIONS & LANGUAGES

Certifications: PL-300 Power BI Data Analyst (in progress) | ETL Data in Power BI (Microsoft) | Data Analyst with Excel (Microsoft) | SQL for Data Science (UC Davis) | Python for Data Science (IBM)

Languages: English - C1 | Hindi - Native | Polish - A2

EDUCATION

B.Eng., Engineering / Industrial Management

10/2022 - 03/2026

Poznan University of Technology | Poznan, Poland | Grade: 4.5 / 5.0
